

CURRICULUM VITA

Patricia M. Williams, Ph.D., *DABT*
BS, MS, ASCP(MT)
President, Environmental Toxicology Experts, L.L.C.
Board Certified by the American Board of Toxicology—Diplomate status
Board Certified by the American Society of Clinical Pathologists
Louisiana License Clinical Laboratory Scientist-Generalist
G00023
Laboratory Director – CLIA Certification 19D0898394 (1993-2005)

Retired:

Associate Professor
Coordinator for Toxicology Research Laboratories
Pontchartrain Institute for Environmental Sciences
College of Sciences, University of New Orleans

Associate Professor
Department of Medicine
Section of Occupational and Environmental Medicine
LSU Health Sciences Center in Shreveport, LA
Director, Occupational Toxicology Outreach Program
Co-Director, Center of Excellence for Clinical and Forensic Toxicology

RESIDENCE: 63 Walnut Place, Covington, LA 70433

BIRTHPLACE: New Orleans, Louisiana

EDUCATION AND TRAINING:

Louisiana State University in Baton Rouge; **B.S. in Medical Technology**, 1966

Louisiana State University in Baton Rouge; **M.S. in Microbiology**, 1975

Tulane Medical Center, **Department of Anatomy, Ph.D.**, 1983. Dissertation Title:
"Characterization of Megakaryocytopoiesis Under the Hormonal Influence of
Thrombopoietin; Development of an In Vitro Assay for Thrombopoietin."

Board Certification: Diplomate of the American Board of Toxicology, 2006-2011,
2012-2016, 2017-2021; 2022-2026.

Board Certification: American Society of Clinical Pathologists-Medical
Technology-1966

Clinical Laboratory Scientist-Generalist, Louisiana License Number: G00023

Laboratory Director – CLIA Certification 19D0898394 (1993-2005)

Tufts University School of Medicine, Epidemiology Research Institute, Graduate Credit in Epidemiology. "Introduction to Epidemiology", 1996. Total Number of CEU Hours, 35.0. Graduate Credit, 2.0 hours.

Tufts University School of Medicine, Epidemiology Research Institute, Graduate Credit in Epidemiology, "Biology & Epidemiology of Cancer" and "Occupational & Environmental Epidemiology", 2001. Total Number of CEU Hours, 30.0. Graduate Credit, 2.0 hours.

University of Michigan, Summer Graduate School in Epidemiology, "Occupational & Environmental Exposure Assessment" and "Basic Computer Applications in Epidemiology", 2002 Continuing Education. Total Number of Non-Credits, 1. Total Number of CEU Hours, 35.0.

University of Michigan, Summer Graduate School in Epidemiology, "Analysis of Epidemiologic Data: An Applied Approach" 2004 Continuing Education. Total Number of Non-Credits, 1. Total Number of CEU Hours, 17.5.

University of Kansas Medical Center, Department of Pharmacology, Toxicology, and Therapeutics, Mid-America Toxicology Course, 2006

Mid-America Toxicology Course, Curtis D. Klaassen, Kansas City, Mo. Lectures in Toxicology for American Board of Toxicology Exam, 2018

PROFESSIONAL EXPERIENCE:

May, 2005 - Present

President
Environmental Toxicology Experts, L.L.C.
Metairie, Louisiana 70005

May, 2005 – March 2017

Associate Professor

Coordinator for Toxicology Research Laboratories
Pontchartrain Institute for Environmental Sciences
College of Sciences
University of New Orleans, New Orleans, LA

March, 1993 – April, 2005

Associate Professor

Director, Occupational Toxicology Outreach Program
Department of Medicine
LSU Health Sciences Center in Shreveport, LA

Co-Director, Center of Excellence for Clinical
and Forensic Toxicology Department of Medicine
LSU Health Sciences Center in Shreveport, LA

Associate Professor, Department of Medicine
Section of Occupational and Environmental Medicine
LSU Medical Center -Shreveport, LA

	Laboratory Director, Medical Surveillance Laboratory Occupational Toxicology Outreach Office CLIA Certified
January, 1992 - February, 1993	Associate Professor, Department of Medical Technology, School of Allied Health Professions, LSU Medical Center Associate Professor, Department of Anatomy, School of Medicine, LSU Medical Center (Joint Appointment)
July, 1985 - January, 1992	Associate Professor, Head, Department of Medical Technology, School of Allied Health Professions, LSU Medical Center Associate Professor, Department of Anatomy, School of Medicine, LSU Medical Center (Joint Appointment)
January, 1985 - June, 1985	Assistant Professor, Head, Department of Medical Technology, School of Allied Health Professions, LSU Medical Center Assistant Professor, Department of Anatomy, School of Medicine, School of Medicine, LSU Medical Center (Joint Appointment)
January, 1984 - December 1984	Assistant Professor, Department of Medical Technology, School of Allied Health Professions, LSU Medical Center Assistant Professor, Department of Anatomy, School of Medicine, LSU Medical Center (Joint Appointment) Assistant Professor, Department of Biological Sciences, University of New Orleans (Joint Appointment)
1978 - 1984	Assistant Professor, Department of Medical Technology, School of Allied Health Professions, LSU Medical Center Assistant Professor, Department of Biological Sciences, University of New Orleans (Joint Appointment)
1975 - 1978	Instructor in Medical Technology, Department of Medical Technology, School of Allied Health Professions, LSU Medical Center

	Instructor, Department of Biological Sciences, University of New Orleans (Joint Appointment)
1974 - 1975	Associate in Physiology, Department of Zoology and Physiology, Louisiana State University in Baton Rouge
1970 - 1971	Medical Technologist, Hematology Laboratory, The Pathology Laboratory, Baton Rouge, Louisiana
1967 - 1968	Medical Technologist, Clinical Chemistry, Department of Pathology, Charity Hospital in New Orleans
1966 - 1967	Medical Technologist, Blood Banking, Department of Anesthesiology, Charity Hospital in New Orleans Medical Technologist, Clinical Chemistry, Department of Pathology, Hotel Dieu Hospital in New Orleans
1965 - 1966	Medical Technician, Hematology, Urinalysis, Chemistry, Blood Banking, Department of Pathology, Hotel Dieu Hospital in New Orleans MT(ASCP) Registration by the American Society of Clinical Pathologists #56466 in 1966

ADMINISTRATIVE EXPERIENCE:

For seven years, Dr. Patricia M. Williams served as Head of the Department of Medical Technology, School of Allied Health Professions, LSU Medical Center. The Department of Medical Technology offered a baccalaureate degree in the field of Medical Technology which includes performance of laboratory procedures in all of the disciplines of the clinical (medical and forensic) laboratory of today. Specific areas of specialty in which the students are trained include: microbiology, parasitology, hematology, immunology, immunohematology (blood banking), clinical chemistry, urinalysis, phlebotomy, and management. The primary objective of the Department of Medical Technology from 1985-1992 was to increase the supply, at the undergraduate and graduate levels, of patient-oriented health professionals both in the rural and urban areas of the State of Louisiana. Dr. Patricia Williams developed a clinical rotation that includes a six-months student clinical laboratory housed within the Department of Medical Technology and a six-months clinical hospital rotation. This allowed all lectures and basic laboratory training to be completed prior to the hospital rotation and thus allow smaller hospitals in the rural areas of the State to participate in the Medical Technology Program. Participation of hospitals in the educational program usually enhances their recruitment of medical technologists upon graduation to their institution to meet the needs of rural health care.

Dr. Patricia M. Williams as Head of the Department of Medical Technology was the overseer of a statewide program to educate students at the baccalaureate level and graduate level in medical technology. Classes were conducted on both the New Orleans and Shreveport LSU Medical Center campuses as well as in ten hospital affiliates throughout the state. Students pursuing the

degree in medical technology could enter either the two plus two program on the New Orleans campus or the three plus one program on either the Shreveport or New Orleans campus. In the two plus two curriculum, the student completes the first two years of pre-professional courses at various colleges throughout the state, followed by two years at the Medical Center and at selected clinical affiliates. This program allowed for entrance of educationally, socially, financially, or racially disadvantaged students into the study of Medical Technology. In the three plus one program the student completed the first three years of pre-professional courses at the various colleges throughout the state, followed by three semesters of courses at the Medical Center and at selected clinical affiliates. Students enrolled in both programs spent six months in the senior year in a simulated hospital clinical laboratory housed within the Department of Medical Technology in both Shreveport and New Orleans. The last six months of the senior year was spent in one of ten hospital affiliates throughout the state. The ten affiliates are listed below:

Charity Hospital in New Orleans
Veterans Administration Medical Center in New Orleans
Mercy Hospital in New Orleans
Southeast Louisiana Medical Center in Houma
Terrebonne General Hospital
Earl K. Long Hospital in Baton Rouge
Louisiana Reference Laboratory in Baton Rouge
Lafayette General Hospital
LSU Hospital in Shreveport
E.A. Conway Hospital in Monroe

Dr. Williams had the responsibility to develop, organize, administer, review, revise and direct the educational program. It was her responsibility to ensure appropriate instruction in all areas of this clinical educational program. Examples of such duties include but are not limited to the following: development of curriculum, selection of course content, implementation of classroom teaching in both the Medical Center and the hospital affiliates, appointing faculty to the program, providing continuing clinical education for hospital laboratory personnel, maintaining current written affiliation agreements with all clinical affiliates, and implementation of recruitment programs on the following campuses: LSU in Shreveport, Bossier Community College, LSU in Alexandria, LSU in Baton Rouge, LSU in Eunice, University of New Orleans, and Southern University in Baton Rouge. Because of the vast geographic structure of the program, Dr. Williams appointed three assistant administrative positions under her direct supervision: Coordinator of Clinical Laboratories, Coordinator of Student Laboratories, and Program Coordinator in Shreveport. Dr. Williams was the direct supervisor of 9 full time faculty, 23 part-time faculty, and 3 full time staff and one part-time staff personnel on both the Shreveport and New Orleans campuses of the LSU Medical Center. In addition, Dr. Williams directly supervised the participation of 121 gratis clinical faculty in the educational program in ten hospital affiliates. Dr. Williams was responsible for management of the departmental budget and played a major role in all policy and budget matters which affected the educational program and the Department of Medical Technology. The 1990 - 91 departmental budget consisted of \$728,673 of state funds: In the last five years of her administration, laboratory equipment purchased by the Department of Medical Technology for teaching purposes amounted to approximately \$509,024.

In addition to the institutional support, the Department of Medical Technology was the recipient of a \$472,719 federal grant from the Health Careers Opportunity Program for enrichment and retention of disadvantaged students in Allied Health Programs. The grant includes the following programs: Medical Technology, Respiratory Therapy, Occupational Therapy, Physical Therapy, and Rehabilitation Counseling. Dr. Williams was the author of this grant and served as Program

Director and administrated expenditure of all funds and implementation of the four programs included in the grant. This grant provided funds for a five-week summer program for high school seniors on the Southern University in Baton Rouge campus, a two-week program for college freshmen on the Southern University in Baton Rouge campus, one four week program for students accepted but prior to enrollment in Allied Health Programs on the LSU Medical Center campus, and a non-structured academic program for juniors and seniors in the School of Allied Health Professions on the LSU Medical Center campuses in Shreveport and New Orleans which included academic tutorials, teaching aids and academic and personal counseling.

The success of this grant funding under the direction of Dr. Williams was best shown in the Department of Medical Technology where a minority enrollment of 30 - 48% was maintained each year. The Department of Medical Technology maintained excellent academic standards for all students, and implemented minority/disadvantaged student incentives in an effort to assist these students in achieving successful completion of a baccalaureate degree in Medical Technology. For two years in a row, (August 1990-1991) the results of these incentives were remarkable. There was 100% passage of each graduating class on the National Registry Exam for each of these two years. The class average ranked in the 12th and 16th percentile of the nation. These results included as many as 30 - 48% minority/disadvantaged students. Many of these students applied to the program with GPA's less than 2.5 and were accepted as a part of the departmental program for high-risk minority/disadvantaged students. The departmental C students were proven "A" students on the national level.

In addition, Dr. Williams was the Laboratory Manager of the Department of Medical Technology Clinical Laboratory. This departmental laboratory was approved for Medicare and Medicaid by the Department of Health and Hospitals of the State of Louisiana. Dr. Williams supervised one part-time pathologist who served as Laboratory Director and the academic faculty who maintained their laboratory skills by performing procedures in the departmental laboratory. Dr. Williams founded this laboratory to serve the health needs of the students in the Schools of Medicine, Nursing, and Allied Health and to perform procedures for them at cost, in addition to allowing academic faculty to maintain their laboratory skills. Blood products from the departmental laboratory were pooled to hide patient identity and used in teaching of the six-month student laboratory. Thus, students used blood products from a relatively healthy population to begin the performance of laboratory procedures. The risk of exposure to AIDS and Hepatitis B is less in this initial use of blood products and performance of laboratory procedures. Results of the laboratory procedures on students in the above mentioned schools were referred to the staff physician of the Office of Student Health of the LSU Medical Center.

Dr. Williams directed the Occupational Toxicology Outreach Program of the Department of Medicine of LSU Health Sciences Center in Shreveport for over ten years. Dr. Williams directed statewide programs to provide an outreach center for education, prevention, early detection, and treatment of diseases for members of the community and workplace exposed to toxic chemicals including drugs and alcohol. In that capacity, Dr. Williams surveyed or evaluated over 17,000 workers or community members with occupational or environmental toxic exposures for adverse health effects of such exposures. She served as tenured Associate Professor of Medicine of the Department of Medicine of LSU Medical School in Shreveport. Additionally, Dr. Williams served as the Laboratory Director of an in-house research laboratory for Medical Surveillance for adverse health effects of chemical exposure. In this capacity, she was responsible for identifying the laboratory parameters that are clinical indicators of environmental and occupational toxic exposure and for the interpretation of the laboratory parameters to the attending physicians. Dr. Williams also served as Co-Director of the Center of Excellence for Clinical and forensic Toxicology. In that capacity she conducted extensive prevention programs for workplace, communities, homes, and schools, both in State and out of State, including the physical consequences of inhalant abuse,

fetal alcohol syndrome, alcohol toxicity, and the physical signs and consequences of drugs and alcohol abuse.

Formerly, Dr. Williams was Coordinator for Toxicology Research Laboratories of the Pontchartrain Institute for Environmental Sciences, College of Sciences, University of New Orleans in Louisiana. She was responsible for development and teaching of toxicology courses for graduate and undergraduate students enrolled at the University of New Orleans.

Dr. Williams is currently the President of Environmental Toxicology Experts, L.L.C. and in that capacity serves as expert witness and consultant to toxic tort litigation. She has served as an expert/consultant in litigation for over thirty years. She has qualified in Courts of Law to identify and interpret patterns of development of disease in association with toxic exposure; to determine the etiology/causation of environmental and occupational diseases; conduct community health assessments and interpret the etiology/causation of environmental diseases and birth defects; to identify and interpret patterns of adverse reproductive outcomes, including fetal birth defects and embryonal tumors, in association with toxic exposure; qualified to review the scientific and medical literature, and medical and laboratory data associated with occupational and environmental exposures and to interpret said data as to the etiology/causation; to perform and interpret medical surveillance utilizing laboratory procedures as to the development and causation of environmental and occupational diseases; and to interpret the causation of hematological diseases as related to environmental and occupational exposures. Additionally, Dr. Williams has qualified to interpret the role of contributing factors in the development of cancer and birth defects. Dr. Williams has qualified as an expert in anatomy, hematology, toxicology, medical surveillance utilizing laboratory procedures, neuroanatomy, and performance and interpretation of health assessments of environmentally exposed communities.

In the area of Forensic Drug Testing, I have served as an expert witness and consultant on collection of specimens, chain of custody, and drug-testing in the workplace to numerous clients, including the Department of Education, School Boards, Unions, Medical Care Corporations, municipalities, the State of Louisiana, and private entities, and served as consultant to a collection company for collection of forensic urine and blood specimens and, in that capacity, designed and oversaw the administration of chain of custody and collection procedures. Furthermore, I have served as expert witness in drug-testing litigation in State Court, Workman's Compensation and Unemployment compensation hearings, arbitration hearings, and criminal court as expert witness for the prosecution. I have served as expert witness in numerous legislative committees on the subject of drug-testing and minimal guidelines for collection and testing of forensic specimens. I drafted the bill for Louisiana Act 1036 of the 1990 Legislative Session establishing minimal guidelines for collection of forensic specimens and drug-testing in the State of Louisiana. Additionally, I drafted Act 396 of the 1993 Legislative Session for Mandatory Licensure of Clinical Laboratory Personnel and Certification of Phlebotomists in the State of Louisiana. I was the expert witness testifying for both bills at the request of Senators and Representatives, the Commissioner of Administration, the AFL-CIO, and the Louisiana State Society for Medical Technology during the course of passage into Law by the Louisiana Legislature.

As a Board-certified Diplomate of the American Board of Toxicology, I have qualified, have the toxicology expertise, and have testified in civil and criminal cases on the following: the mechanisms of action of prescription and illicit drugs and alcohol; toxic effects of drugs and alcohol; signs of impairment of drugs and alcohol; mechanisms for production of these signs in the body; temporal occurrence of the signs of impairment specific to each drug or alcohol; the absorption, distribution, and elimination of drugs and alcohol; and peak plasma concentrations,

biological half-lives, and elimination half-lives for the specific drugs and alcohol. I have testified in numerous civil and criminal cases as to the interpretation of impairment; and interpretation of the signs of intoxication and impairment with and without the drug testing result analyses. I have served as the “pro bono” expert witness for the prosecution for District Attorneys in the Parishes of Orleans, Jefferson, East Baton Rouge, and St Landry Parishes. These cases have involved interpretation of the following: drug and alcohol testing; calculation of blood concentrations of alcohol at the time of the crash using established scientific methodology; interpretation of impairment from the clinical signs of impairment specific to each drug and or alcohol; interpretation of impairment from the clinical signs of impairment specific to each drug or alcohol testing result; and interpretation of post-mortem drug and alcohol testing as to impairment or toxicological cause of the death of the deceased. I have testified in several trials with drug or alcohol matters including, Murder II and Vehicular homicide. In these trials, I also gave interpretations of impairment and the drug and/or alcohol cause of impairment; windows for the time of death and toxicological cause of death from heroin; and back calculation of the alcohol concentrations at the time of death using the Widmark equation, zero order kinetics, and first order kinetics of alcohol metabolism. I have provided continuing education to the Louisiana Assistant District Attorneys and Drug Recognition Experts officers in Louisiana, the Louisiana State Police Crime Lab, Law Enforcement and DEA officers, and the Family Law Section of the Louisiana Bar Association. Many of the presentations were to teach the interpretation of the clinical signs of impairment including Nystagmus; specific Cranial Nerve involvement in nystagmus and loss of visual acuity; miosis (pupil constriction) and specific visual impairments; mydriasis (pupil dilation) and specific visual impairments; temporality of blood shot eyes from marijuana use; motion parallax and impairment of depth perception; vision tunneling; sedative-hypnotic toxidrome of methadone; parasomnias of Zolpidem; tunnel vision of benzodiazepenes (including alprazolam); driving impairment of benzodiazepenes expressed by Standard Deviation of Lateral Position and Standard Deviation of Speed; CNS depression of Heroin and clinical warning signs of imminent death, “Pharming” using over the counter drugs and specific effects of impairment; CNS depressants; CNS stimulants rhabdomyolysis of cocaine toxicity; and post-mortem alcohol production. These same topics and more are subjects of Dr. Williams’ expert witness reports and testimony in both civil and criminal cases.

By virtue of my educational, research, and work experience, I am qualified to identify and interpret patterns of development of disease in association with toxic exposure and to determine the etiology/causation of environmental and occupational diseases. I am qualified to conduct community health assessments and interpret the etiology/causation of environmental diseases and birth defects. I am qualified to identify and interpret patterns of adverse reproductive outcomes, including fetal birth defects and embryonal tumors, in association with toxic exposure. I am qualified to review the scientific and medical literature, and medical and laboratory data associated with occupational and environmental exposures and to interpret said data as to the etiology/causation. I am qualified to perform and interpret medical surveillance utilizing laboratory procedures as to the development and causation of environmental and occupational diseases. I am qualified to interpret the causation of hematological diseases as related to environmental and occupational exposures.

Additionally, I am qualified to interpret the role of contributing factors in the development of cancer and birth defects. I have qualified as an expert in anatomy, hematology, toxicology, medical surveillance utilizing laboratory procedures, neuroanatomy, and performance and interpretation of health assessments of environmentally exposed communities.

In the areas of forensic drug testing, as a licensed Clinical Laboratory Scientist who is board-certified by the American Society of Clinical Pathologists, I am qualified to perform analytical

testing for drugs, review and interpret medical and laboratory data, including the phlebotomy, chain of custody, and accessioning techniques utilized in the collection of medical and forensic drug specimens. As a toxicologist who is Board-certified in toxicology by the American Board of Toxicology, I am qualified to opine on the metabolism, biotransformation, and distribution of drugs, chemicals, and alcohol in the body. I am further qualified to interpret drug testing results with impairment correlation. Additionally, I testify for several District Attorneys in various Parishes in the State of Louisiana as well as the Office of the Attorney General for criminal prosecution in matters of drug and alcohol intoxication and loss of life.

As a Board-certified Clinical Laboratory Scientist (Board certified by the American Society of Clinical Pathologists) who is licensed by the State of Louisiana and qualified by both State and Federal Law to perform and interpret clinical laboratory procedures in all areas of laboratory procedures at all levels of complexity, including the areas of hematology and immunology, I am qualified to review, interpret, and propose medical surveillance using laboratory procedures. I am further qualified by Federal Law (CLIA-Clinical Laboratory Improvement Act) to serve as a Laboratory Director for all levels of complexity in the interpretation of laboratory procedures, which include hematology and immunology. As a Board-Certified toxicologist holding the title of Diplomate of the American Board of Toxicology, I am qualified to interpret these procedures as to the resultant health effects of toxic chemicals.

TEACHING EXPERIENCE:

EES 4096/4096G Toxicology and Human Health, EES 6096 Toxicology of Coastal Organisms, EES 4096/4096G Ecotoxicology, EES 2096 Environmental Toxicology, Independent Research Study, EES 4096/5096 Toxicology of Metals, BIOS 3284 Histology and Cytology with lab (4 hrs credit, BIOS 3490 Histology and Cytology (3 hrs credit); EES 4096/5096 Reproductive and Developmental Toxicology (3 hrs credit). EES 4096/5096 Histology and Cellular Toxicology (3 hrs credit)

Lecture to second year medical students on the “Environmental Etiology of Disease”, which includes: recognizing the adverse health patterns commonly observed in chemically associated diseases, the multifactorial nature of disease, effects of chemical interactions in a mixture, dose-response, and the cellular effects of DNA reactive carcinogens.

Lectures to Medical Students, Graduate students, Dental Maxillo-Facial Surgery Residents, and Pathology residents and Undergraduate Medical Technology students: Hematology, Histology, Gross Anatomy, Cell Biology, Medical Histology, Microscopic Anatomy, Neuroscience, Embryology, Clinical Chemistry, Human Anatomy, Gross and Microscopic Anatomy for Cytotechnology Majors, Mammalian Physiology, Immunology, Immuno-hematology, Parasitology, Clinical Toxicology.

Lectures to Environmental Law Graduate Students at Tulane Law School entitled “Daubert and Expert Testimony” at Tulane Law School in New Orleans, Louisiana.

GRADUATE RESPONSIBILITIES:

Dissertation: Volatile Organic Compounds Emission during Cured-in-Place-Pipe (CIPP) Sewer Pipe Rehabilitation and Comparison of Solid Waste Generation, Greenhouse Gases and Criteria Air Pollutants Emission from CIPP and Open-Cut Sites Doctor of Philosophy in Engineering and Applied Science (Environmental Engineering) Elena Bourbour Ajdari, Completed May 2016

Thesis: Arsenic, Cadmium, Copper, and Zinc Levels in Crayfish from Southwest Louisiana and the Atchafalaya Basin Master of Science in Earth and Environmental Science E. Gerald Hebert Completed December 2015

Disertation: Photocatalytic Mineralization of Phenol on fluidized Titanium Oxide-Coated Silica Gel Doctor of Philosophy in Engineering and Applied Science (Environmental Engineering). Guillermo Rincon BS. MS. Completed May 2015.

Dissertation: Preliminary Hydrogen Sulfide Emission Factors and Emission Models for Wastewater Treatment Plant Headworks. Doctor of Philosophy in Engineering and Applied Science. Amitdyuti Sengupta. Completed May 2014.

Thesis: Air Dispersion Modeling for Criteria Pollutants from Port of New Orleans and Their Health Effects. Master of Science in Environmental Engineering. Amrita Iyer. Completed May, 2014.

Thesis: Odor Monitoring at Wastewater Treatment Plants. Master of Science in Environmental Engineering. Natasha Halageri. Completed December, 2012.

Thesis: Preliminary Assessment: Identification of Chinese Drywall and Exposure to Particulates and Metals during Cutting and Installation of Drywall. Master of Science in Environmental Engineering, Vandana Karap, completed May, 2011.

Thesis: Mact Implementation at an Organic Chemical Manufacturing Facility: Human Health Risk Reduction; Master of Science in Environmental Engineering, Keith E. Gordon, completed July, 2010.

Thesis: Carbon Dioxide and Hydrogen Sulfide Emission Factors Applicable to Wastewater Wet Wells; Master of Science in Environmental Engineering, Madhuri Mudragaddam, completed May 2010.

Thesis: Total Fume and Heavy Metals Emission Factors Applicable to Aluminum Lithium Welding; Master of Science in Environmental Engineering, Katie Carr, completed May, 2010

Thesis: Environmental analysis of the habitat (biotic and abiotic factors) associated with Broadleaf Barbara's Buttons (Marshallia trinervia); Master of Science in Earth and Environmental Sciences, Jennifer L. Blanchard, completed December. 2009.

Thesis: Monitoring and Inverse Dispersion Modeling to Quantify VOCs from a Municipal Solid Waste landfill; Master of Science in Environmental Engineering, Sarit K. Das, completed December 2009.

Thesis: Risk Assessment and Risk Management of Nano-Material Toxicity (Manufacturing and Natural Environment); Master of Science in Environmental Engineering, Farah Bigdeli, Completed May, 2009.

Thesis: Risk assessment for the content of heavy metals in PM2.5 and PM10 from traffic exhaust emissions in heavily transited areas of New Orleans. Master of Science in Environmental Engineering, Federico Portillo, completed December, 2008.

Committee Chairman, Masters of Allied Health Sciences, Mr. Darryl Vincent. Topic: "Evaluation of Streptokinase Therapy".

Research Supervisor, Masters of Anatomy, Mr. Sean Bailey. Topic: "Megakaryocytopoiesis.11

Committee Chairman, Masters of Allied Health Sciences, Ms. Louaine Spriggs, Topic: Investigation of Leukocyte Inclusions Using New Methylene Blue."

Committee Chairman, Masters of Allied Health Sciences, Ms. Conchetta S. Buttone. Topic: "HPLC Testing of Carotenoids in Preparation of an Acute Study to Compare the Effect of Natural/Synthetic Dietary Sources of Carotenoids on Human Sera."

Committee Chairman and Research Supervisor, Masters of Allied Health Sciences, Ms. Susan Vaught. Topic: "Development of Skin Biopsy Ultracryomicrotomy For Use In Immunocytochemical Study of Acute Graft-Versus-Host Disease."

Committee Chairman and Research Supervisor, Masters of Allied Health Sciences, Ms. Gloria A. Hagan. Topic: "Immunocytochemical Identification of Megakaryocytes Utilizing a Polyclonal Antibody."

Consultant to Capitol Home Health and Hospice to design, organize and implement a drug-testing program.

Expert Witness and Consultant to numerous plaintiff's attorneys for litigation involving drug testing in State and Federal Court and Workman's Compensation and Unemployment Compensation Hearings.

Expert Witness and Consultant to numerous plaintiff's attorneys for litigation involving toxic chemical exposure in Federal and State Court and Workman's Compensation Hearings.

Expert Witness and Consultant to numerous District Attorneys in the State of Louisiana in criminal litigation as Witness for the Prosecution as *pro bono* expert.

Prostate Cancer Prevention Program, Organizer, February 1994, Lake Charles, Louisiana, 160 participants.

PRESENTATION OF INVITED LECTURES OR WORKSHOPS:

“Daubert and Expert Testimony”, November 13, 2018, Tulane University Law School, New Orleans, Louisiana. Summary: Historical Evidentiary Rulings, Federal Rules of Evidence 702, Daubert v Dow, Havner, Reference Manual on Scientific Evidence, Sir Bradford Hill Points for Consideration in General and Specific Causation; Internal and External Causation, Completed Exposure Pathway, Mechanism of Action, Toxicology, Epidemiology, Risk Assessment, Louisiana Act 787 and Genetics in the Courtroom arena: Mutations and Disease, Cancer, Birth Defects. (2 hour lecture. Graduate Course Credit)

“Daubert and Expert Testimony”, 2017, Tulane University Law School, New Orleans, Louisiana. Summary: Historical Evidentiary Rulings, Federal Rules of Evidence 702, Daubert v Dow, Havner, Reference Manual on Scientific Evidence, Sir Bradford Hill Points for Consideration in General and Specific Causation; Internal and External Causation, Completed Exposure Pathway, Mechanism of Action, Toxicology, Epidemiology, Risk Assessment, Louisiana Act 787, and Epigenetic and Transgenerational Carcinogenesis. (2 hour lecture. Graduate Course Credit)

Louisiana State Bar Association Seminar: Family Law Conference, Metairie, La. “Drug Testing Options and Burden of Proof.” May 19, 2017.

“Daubert and Expert Testimony”, 2016, Tulane University Law School, New Orleans, Louisiana. Summary: Historical Evidentiary Rulings, Federal Rules of Evidence 702, Daubert v Dow, Havner, Reference Manual on Scientific Evidence, Sir Bradford Hill Points for Consideration in General and Specific Causation; Internal and External Causation, Completed Exposure Pathway, Mechanism of Action, Toxicology, Epidemiology, Risk Assessment, Louisiana Act 787 and Talc-Based Powder Products Litigation. (2 hour lecture. Graduate Course Credit)

“Drunk Driving vs Drugged Driving: The New Era of Difficulties in Prosecution” February 11, 2016, Louisiana State Police Crime Lab, Baton Rouge, Louisiana.

“Daubert and Expert Testimony”, December 3, 2015, Tulane University Law School, New Orleans, Louisiana. Summary: Historical Evidentiary Rulings, Federal Rules of Evidence 702, Daubert v Dow, Havner, Reference Manual on Scientific Evidence, Sir Bradford Hill Points for Consideration in General and Specific Causation; Internal and External Causation, Completed Exposure Pathway, Mechanism of Action, Toxicology, Epidemiology, Risk Assessment, Louisiana Act 787. (2 hour lecture. Graduate Course Credit)

“Drunk Driving vs Drugged Driving: The New Era of Difficulties in Prosecution” September 10, 2015, East Baton Rouge Parish Office of the District Attorney, Baton Rouge, Louisiana.

Cancer Alley: Rethinking the Terminology. Presentation: Data from the Louisiana Tumor Registry and Cancer prevalence; Tulane Environmental Law Summit, 2014

“Daubert and Expert Testimony”, December 2, 2014, Tulane University Law School, New Orleans, Louisiana. Summary: Historical Evidentiary Rulings, Federal Rules of Evidence 702, Daubert v Dow, Havner, Reference Manual on Scientific Evidence, Sir Bradford Hill Points for Consideration in General and Specific Causation; Internal and External Causation, Completed Exposure Pathway, Mechanism of Action, Toxicology, Epidemiology, Risk Assessment, Toxicology of Fracking; (2 hour lecture. Graduate Course Credit)

“Daubert and Expert Testimony”, November 12, 2013, Tulane University Law School, New Orleans, Louisiana. Summary: Historical Evidentiary Rulings, Federal Rules of Evidence 702, Daubert v Dow, Havner, Reference Manual on Scientific Evidence, Sir Bradford Hill Points for Consideration in General and Specific Causation; Internal and External Causation, Completed Exposure Pathway, Mechanism of Action, Toxicology, Epidemiology, Risk Assessment, Louisiana Act 787, **Epigenetic Mechanisms, Radiation effects**; (2 hour lecture. Graduate Course Credit)

Heavy Metal Analysis of Northern Gulf of Mexico White Shrimp Harvested Following the Deepwater Horizon Oil Spill; Poster Presentation. 3rd Anniversary of Deepwater Horizon Incident Conference, Baton Rouge, LA. April 22, 2013.

Impacts of the BP Blowout, The Unknown Consequences and Liabilities; Presentation: **Seafood Safety and Analysis**; Tulane Environmental Law Summit, 2012.

Symposium: “Health Effects in Heavily Polluted Areas.” Presented Health Effects from long-term exposure to Creosote in Bossier City. Environmental Mutagen Society, Seattle Washington, September 11-13, 2012

“Daubert and Expert Testimony”, November 13, 2012, Tulane University Law School, New Orleans, Louisiana. Summary: Historical Evidentiary Rulings, Federal Rules of Evidence 702, Daubert v Dow, Havner, Reference Manual on Scientific Evidence, Sir Bradford Hill Points for Consideration in General and Specific Causation; Internal and External Causation, Completed Exposure Pathway, Mechanism of Action, Toxicology, Epidemiology, Risk Assessment, Louisiana Act 787. BP Oil Spill and Seafood Safety. (2 hour lecture. Graduate Course Credit)

Symposium: **“Environmental Oil Contamination: Effects on Marine life and Human life.”** Topic presented: Are Seafood Safety Considerations Adequate To Prevent Chronic Health Effects Of The Deep Water Horizon Oil Spill On Coastal Louisiana Residents. Environmental Mutagen Society, Montreal Canada, October 16-20, 2011.

“Potential Health Effects of Chinese Dry Wall (CDW) Components: A Preliminary Analysis,” Air and Waste Management Association, 104th Annual Conference & Exhibition of the Air & Waste Management Association, Orlando, Florida, June 21-24, 2011. Study of Adverse Health Effects of a population of residents living in houses with Chinese Dry Wall.

“Daubert and Expert Testimony”, October 25, 2011, Tulane University Law School, New Orleans, Louisiana. Summary: Historical Evidentiary Rulings, Federal Rules of Evidence 702, Daubert v Dow, Havner, Reference Manual on Scientific Evidence, Sir Bradford Hill Points for Consideration in General and Specific Causation; Internal and External Causation, Completed Exposure Pathway, Mechanism of Action, Toxicology, Epidemiology, Risk Assessment, Louisiana Act 787. BP Oil Spill and Seafood Safety. (2 hour lecture. Graduate Course Credit)

“Health Damages caused by Chinese Drywall”; Harris Martin Chinese Drywall Litigation Conferences, October 28, 2010, Miami, Florida. Summary: comparison of constituents in American Drywall and preliminary testing on Chinese Drywall; preliminary analysis of resident complaints from homes with Chinese Drywall; Contaminants in gaseous emissions; Contaminants in particulate matter releases; Completed exposure pathways (45 minutes. **CLE credit**)

Invited presentation: **“Deepwater Horizon Oil Spill”**, Greenwich Academy, Greenwich, Connecticut. October 15, 2010.

“Daubert and Expert Testimony”, November 9, 2010, Tulane University Law School, New Orleans, Louisiana. Summary: Historical Evidentiary Rulings, Federal Rules of Evidence 702, Daubert v Dow, Havner, Reference Manual on Scientific Evidence, Sir Bradford Hill Points for Consideration in General and Specific Causation; Internal and External Causation, Completed Exposure Pathway, Mechanism of Action, Toxicology, Epidemiology, Risk Assessment, Louisiana Act 787. BP Oil Spill and Seafood Safety. (2 hour lecture. Graduate Course Credit)

Invited testimony to Louisiana Senate Judiciary A Committee on Health Effects of Chinese Drywall; requested by Senator Julie Quinn; May 19, 2009; Summary: report on preliminary analysis of resident complaints from homes with Chinese Drywall and associations with gaseous and particulate contaminants released from contaminated drywall.

“Health Damages caused by Chinese Drywall”; HB Litigation Conferences, June 18, 2009, New Orleans, Louisiana Summary: comparison of constituents in American Drywall and preliminary testing on Chinese Drywall; preliminary analysis of resident complaints from homes with Chinese Drywall; Contaminants in gaseous emissions; Contaminants in particulate matter releases; Completed exposure pathways. (30 minutes. CLE credit).

“Health Damages caused by Chinese Drywall”; Harris Martin Chinese Drywall Litigation Conferences, June 4, 2009, Orlando, Florida. Summary: comparison of constituents in American Drywall and preliminary testing on Chinese Drywall; preliminary analysis of resident complaints from homes with Chinese Drywall; Contaminants in gaseous emissions; Contaminants in particulate matter releases; Completed exposure pathways (45 minutes. **CLE credit**)

“Benzene—General and Specific Causation of Myelodysplastic Syndrome/RARS” Harris Martin Benzene Litigation Conference, December 9, 2009, Las Vegas, Nevada. Summary: Mechanism of action of benzene interference in mitochondrial function; formation of ringed sideroblast; benzene hematotoxicity, cytogenetic abnormalities, latency, and epidemiology of AML/MDS. (1 hour 15 min **CLE credit**)

“Daubert and Expert Testimony”, October 13, 2009, Tulane University Law School, New Orleans, Louisiana. Summary: Historical Evidentiary Rulings, Federal Rules of Evidence 702, Daubert v Dow, Havner, Reference Manual on Scientific Evidence, Sir Bradford Hill Points for Consideration in General and Specific Causation; Internal and External Causation, Completed Exposure Pathway, Mechanism of Action, Toxicology, Epidemiology, Risk Assessment, Louisiana Act 787. (2 hour lecture. Graduate Course Credit)

“Daubert and Expert Testimony”, November 21, 2008, Tulane University Law School, New Orleans, Louisiana. Summary: Historical Evidentiary Rulings, Federal Rules of Evidence 702, Daubert v Dow, Havner, Reference Manual on Scientific Evidence, Sir Bradford Hill Points for Consideration in General and Specific Causation. (2 hour lecture Graduate Course Credit)

“Historical Access and Use of the Louisiana Tumor Registry Data in analysis of cancer incidence.” November 16, 2007, Tulane University Law School, New Orleans, Louisiana. Summary: Consequences of historic refusal to release data to the public; legal action that mandated data release by Parish, subsequent use of data for regulatory permits, health evaluations surrounding point sources of pollution, litigation; need for zip code data. (2 hour lecture. Graduate Course Credit)

“Aflatoxins and Mycotoxins: Acute and Chronic Health Effects and Biological Warfare.” Grandrounds, LSUHSC-Shreveport, LA, March 8, 2005.

“Asthma Education & Management.” Grandrounds, LSUHSC-Shreveport, LA, September 16, 2003.

“Cancer Mortality Data for Louisiana.” Presented at National Wetlands Research Center Research Center, U.S. Geological Survey Biological Resources Division. Lafayette, Louisiana. April 19, 2002.

“Prevention of Diseases from Toxic Exposure.” Presented at Conoco Inc. Safety Summit Meeting. Denver, Colorado. February 20-21, 2001.

“Prevention of Diseases from Toxic Exposure.” Presented at Conoco Inc. Safety Summit Meeting. Billings, Montana. January 11-13, 2001.

“Prevention of Diseases from Toxic Exposure.” Presented at Conoco Inc. Safety Summit Meeting. Ponca City, Oklahoma. November 28, 2000.

“Prevention of Diseases from Toxic Exposure.” Presented at Conoco Inc. Safety and Occupational Health Training Session. Park City, Utah. July 17, 2000

“Understanding The Medical/Scientific Basis for Evaluation of Toxic Exposure.” Presented at the Louisiana Trial Lawyers Association Toxic Tort Program. Baton Rouge, Louisiana. May 18, 2001.

“Health Effects of the Lincoln Creosote Population” Presentation for the Carcinogen-DNA Interaction with the National Cancer Institute-Tumor Promotion-Laboratory of Cellular Carcinogenesis. Bethesda, Maryland, May 3, 2000.

Introduce the **“St. John Parish Asthma Project”** to the LaPlace Rotary Club. LaPlace, Louisiana. May 9, 2000.

Introduce the **“St. John Parish Asthma Project”** to the LaPlace Minister’s Association. LaPlace, Louisiana. May 6, 2000.

Introduce the **“St. John Parish Asthma Project”** to the St. John Parish Business, Industry and Government Association. LaPlace, Louisiana. April 19, 2000.

Appearance on KTVE Channel 10 and to conduct a radio interview to promote the **‘Lupus Study Project’**. Monroe, Louisiana. March 16-17, 2000.

Introduce **“Lupus Study Project”** to key community leaders and the Town Council of Gibsland, Louisiana. March 6, 2000.

Presentation to the Caddo Parish School Board **“Fetal Alcohol Syndrome Prevention.”** Workshop. February 9, 2000.

“Health Effects of Air Pollution.” Presented at the Take Back Your Air Community Conference. Baton Rouge, Louisiana. January 29, 2000.

“Children of Louisiana –The Environmental Indicator.” Presented at University of New Orleans Environmental Breakfast. New Orleans, Louisiana. January 21, 2000.

Participant in a panel discussion at the Mississippi River Basin Conference at the University of Mississippi at St. Louis. July 9-10, 1999.

“Physical Consequences of Drug, Alcohol, and Inhalant Abuse.” Presented at the FINS Association Conference in New Orleans, Louisiana, May 11, 1999.

“The Toxic Effects of Alcohol.” Presented at St. Peter’s School in Reserve, Louisiana, May 3, 1999.

“Drug and Alcohol Prevention.” Presented in Destrehan at Destrehan High School, April 12, 1999.

“Scientific Methods Used in Louisiana for Evaluating Environmental Pollution.” Presented in New Orleans at Loyola University for Communications students, November 2, 1998.

Prostate Screening, October 21-23, 1998. IAM Union, Lake Charles, Louisiana.

Presentation on Toxic Exposure Claims- Omnet Managed Care Conference 1998 in Lafayette Louisiana. October 8, 1998.

Presentation on Environmental Justice - **“The Basics of Environmental Law.”** Southern University Law Center in Baton Rouge, Louisiana. October 2, 1998.

Presentation on **“Fetal Alcohol Syndrome/Fetal Alcohol Effects”** - Regional FAS/FAE Prevention Seminar for Professionals on Northwestern State University Campus in Natchitoches. August 3, 1998.

Presentation on **“Fetal Alcohol Syndrome/Fetal Alcohol Effects”** - 1997 Drug Free Schools and Communities Regional Fall Symposium in New Orleans Louisiana. University of New Orleans. December 11, 1997.

Presentation on **“Fetal Alcohol Syndrome”** - Governor’s Safe and Drug Free Schools and Communities. North Louisiana Regional Workshop. December 9, 1997. Louisiana State University in Shreveport.

Presentation on **“Health Effects of Metals”** to Local 2518 Machinist Local at Dressor Plant. Tioga Louisiana. November 17, 1997.

Presentation on **“Health Effects of the People of Grand Bois”** in Houma Louisiana. November 4, 1997 to the House and Senate Committees.

Presentation on **“The Role of the Expert Witness in Toxic Tort Litigation: Combustion Site Livingston Parish & Thompson Hayward Site Orleans Parish”** at Southern University Law Center, Lenoir Hall Room 129. November 3, 1997.

Presentation to the Committee of Citizens Bourg Louisiana, regarding Grand Bois. November 3, 1997.

Prostate Screening. October 6-7, 1997. International Paper Mill, Bastrop, Louisiana.

Prostate Screening. September 16-19, 1997. International Paper Mill Bastrop, Louisiana.

Parents Resource Institute for Drug Education, Mandeville High School, "**Alcohol Poisoning.**" Presentation for High School Students. Mandeville, Louisiana, September 9, 1997.
St Charles Parish Schools, In-service for the teachers, "**Fetal Alcohol Syndrome/Fetal Alcohol Effects**", Aug. 13, 14, 15, & 27, 1997. Luling, Hahnville & St. Rose, Louisiana.

State of Louisiana, Office of Youth Development, Jefferson Unit, presentation on "**The Physical Consequences of Drug Abuse**" for the youth, parents, & concerned citizens. New Orleans, Louisiana. August 19, 1997.

"Physical Consequences of Drug and Alcohol Abuse." "Choosing A Drug-Testing Program That Will Withstand A Court Challenge." Alexandria, Louisiana.

Louisiana State University Law School, Current Developments In Employment and Labor Law, March 1990. Baton Rouge, Louisiana. "Drug and Alcohol Testing In the Workplace From the Employer's Perspective."

American Federation of Teachers Lawyer's Conference, Atlantic City. June 1990. "Specifics for Consideration in Negotiating Quality Drug Testing Programs."

AFL-CIO State Convention, Baton Rouge, Louisiana. March 1990. "Protection for A Drug Free Work Place." U.S. Probation Office, May 1990. "Proper Collection techniques for Forensic Urine Specimens." New Orleans, Louisiana.

Louisiana Occupational Health Nurses, Drug Collection Workshop, August 1990. New Orleans, Louisiana.

Southwest Regional Center for Drug-Free Schools and Communities, Salt Lake City, Utah, June 1990. "Choosing A Drug-testing Program That Will Withstand A Court Challenge."

LSU Center for Substance Abuse Prevention, Training, and Research, Training Workshop for the Division of Alcohol and Drug Abuse for the Louisiana Department of Health and Hospitals. Baton Rouge, Louisiana. August, September, October, November 1990. "Procedures in Monitoring Urine Drug Screens and Alcohol."

Occupational Safety Congress and Exposition, Lafayette, Louisiana. September 1990, "Drug Testing."

Louisiana State Department of Education, Drug Abuse Counselors, October 1990, Alexandria, Louisiana. "Physical Consequences of Drug and Alcohol Abuse." "Fetal Development and Fetal Alcohol Syndrome." "Sexually Transmitted Diseases."

Southwest Regional Center for Drug-Free Schools and Communities, Park City, Utah, October 1990. "Choosing A Drug-Testing Program That Will Withstand A Court Challenge."

International Personnel Managers Association, September 1990, Baton Rouge, Louisiana. "Act 1036-minimal Guidelines for Drug-Testing of Specimens Collected in Louisiana."

Louisiana Department of Employment and Training Conference of Administrative Law Judges, August 1990, Lafayette, Louisiana. "Criteria for Judging Acceptable Quality in Drug-Testing Programs."

American Association of Anatomists, April 1983, Panel Discussion on Hemopoiesis, Topic: "Megakaryocytopoiesis."

Seminar: In Vitro Characterization of Megakaryocytopoiesis. Department of Hematology, MD Anderson Hospital and Tumor Institute, University of Texas System Cancer Center, Houston, Texas. June 1983.

Seminar: "An In Vitro Assay for Thrombopoietin Utilizing Guinea Pig Whole Bone Marrow: A System for the Study of Megakaryocytopoiesis." Department of Anatomy, Louisiana State University Medical Center, New Orleans, Louisiana, November 1983.

Seminar: "Transitional Events Linking the Mitotic and Endomitotic Compartments of the Megakaryocytic Series", Tulane University, Department of Biology, New Orleans, Louisiana, April 1984.

Poster Presentation: Hormonal Control of Thrombopoiesis, American Heart Association, Louisiana, Inc., Annual Meeting. May 1981.

Seminar: "Hematology: Basic Morphology, Methodology, and Disease." Charity Hospital in Independence, Louisiana, 1977.

Seminar: "Coagulation: Basic Concepts and Disease." Charity Hospital in Independence, Louisiana, 1977.

Career Seminars for Allied Health Majors, University of New Orleans, LSU in Baton Rouge, LSU in Alexandria, Student Bowl Judge, Louisiana State Society for Medical Technology

Gross Anatomy for Allied Health Majors, Department of Anatomy, LSU Medical Center, New Orleans, Louisiana. Topics: "The Autonomic Nervous System" and "The Peripheral Nervous System."

Cell Biology, Department of Biology, Tulane University, New Orleans, Louisiana, Topic: "The Golgi Apparatus."

Histology, Department of Biology, Tulane University, New Orleans, Louisiana, Topic: "Hematopoiesis."

Medical Histology, Department of Anatomy, Tulane Medical School, New Orleans, Louisiana, Topic: "Hematopoiesis."

Cell Biology, Department of Anatomy, LSU Medical Center, New Orleans, Louisiana, Topic: "Cellular Turnover and Renewal in Differentiated Tissues."

Veterans Administration Hospital, New Orleans, Louisiana, Continuing Education, Topic: "The Impact of DRG's and TEFRA on Medical Technology Education."

New Orleans Society for Medical Technology, New Orleans, Louisiana. Topic: Graduate Education in Medical Technology.

"Lymphoproliferative Disorders", Veterans Administration Hospital, October 1989, Alexandria, Louisiana.

"Immunocytochemical Localization Of Erythropoietin Binding Sites Using The Immunoperoxidase Technique." Presented at the Louisiana Society for Electron Microscopy Symposium, May 1981.

"Development of an In Vitro Assay for Thrombopoietin Using Tritiated-Thymidine Uptake of Megakaryocytic Precursors." Presented at the ICN-UCLA Conference on Normal Hematopoiesis, Keystone, Colorado. March 1983.

"Characterization of Megakaryocytopoiesis Under the Hormonal Influence of Thrombopoietin." Presented at the American Association of Anatomists Meeting, April 1983.

"In Vitro Characterization of Megakaryocytopoiesis." Presented at the Louisiana Society for Electron Microscopy Symposium. May 1983.

"Effects of Thrombopoietin on Megakaryocytic Differentiation In Vitro." Presented at the American Society for Cell Biology Meeting, San Francisco, California. November 1983.

"The Technical and Legal Aspects of Phlebotomy." Department of Medical Technology, Traveling Workshop. Presented to hospital personnel throughout the State of Louisiana.

PARTICIPATION AT PROFESSIONAL MEETINGS AND CONTINUING EDUCATION:

2021

Member American Society of Clinical Pathologists

Member Society of Toxicology

Member Air and Waste Management Association

Member Society of Environmental Toxicology and Chemistry

Member American Association for Clinical Chemistry

CE Course Anderson CE for La State Board of Medical Examiners, Clinical Laboratory Personnel: How the Immune System Works 2021, 12 hours CEUs

SOT CE: Integrating computational tools into carcinogenicity. 1 hour. December 14, 2021

SOT CE: NAMSS Trainee Series—Part 1: “Characterization of nano-sized silica in agricultural exposures and its role in the pathogenesis of chronic kidney disease.” “Effects of engineered nanoparticles on gut-associated bacterial biofilms”. 1 hour. November 4, 2021

2020

Member American Society of Clinical Pathologists

Member Society of Toxicology

Member Air and Waste Management Association

Member Society of Environmental Toxicology and Chemistry

Member American Association for Clinical Chemistry

CE Course Anderson CE for La State Board of Medical Examiners, Clinical Laboratory
Personnel: Pathology for the Health Professions Section B 12/30/20 12 hours CEUs

2019

Member American Society of Clinical Pathologists 1/1/19

Member Environmental Mutagenesis and Genomics Society 1/1/19

Member Society of Toxicology 1/1/19

Member Air and Waste Management Association 1/1/19

Member Society of Environmental Toxicology and Chemistry 1/1/19

Member American Association for Clinical Chemistry 1/1/19

Keystone Symposia: DNA Replication and Genome Instability From Mechanism to Disease
1/13-1/17/19

Annual Meeting of SOT Baltimore, Maryland 2019

Annual Meeting of EMGS Washington DC 2019

SOT CE: Beauty of the Skin is in the Eye of The Beholder: A Basic Course on Dermal and
Ocular Toxicology 4 hours 3/10/2019

SOT CE: Developmental Toxicity of the Skeletal System Interpretation of Findings in DART
Studies and Implications for Risk Assessment. 4 hours 3/10/2019

CE Course Anderson CE for La State Board of Medical Examiners, Clinical Laboratory
Personnel: Pathology for the Health Professions Section A 12/31/19 12 hours CEUs

American Association of Clinical Chemistry Fundamentals of Molecular Pathology Certificate
Program

2018:

Member American Society of Clinical Pathologists 1/1/18

Member Environmental Mutagenesis and Genomics Society 1/1/18

Member Society of Toxicology 1/1/18

Member Air and Waste Management Association 1/1/18

Member Society of Environmental Toxicology and Chemistry 1/1/18

Member American Association for Clinical Chemistry 1/1/18

Annual Meeting of SOT San Antonio, Texas 2018

American Association of Clinical Chemistry-Introductory Liquid Chromatography
Mass Spectrometry for the Clinical Laboratory December 31,2018; 12 hours CE

SOT CE: Assessment of Peri- and Prepubertal Developmental and Reproductive Toxicology
4 hours 3/11/2018

Mid-America Toxicology Course Curtis D. Klaassen April 29-May 4, 2018 37.5 hours 5/4/2018

University of South Alabama Mitchell Cancer Institute, 1st Southern Genome Maintenance
Conference, October 20-21, 2018; Mobile, Alabama 8.75 CEUs

Invited Presentation: Tulane University Law School, Environmental Law Graduate Lecture:
General and Specific Causation from Environmental Exposures, Completed Exposure Pathways,
Mechanism of Action of Toxicants, Toxicology, Epidemiology, and Risk Assessment; Genetics is
coming to the Courtroom: Mutations and Disease, Cancer, Birth Defects, November 2018. (2
hours)

Mid-America Toxicology Course, Curtis D. Klaassen, Kansas City, Mo. Lectures in
Toxicology for American Board of Toxicology Exam, 2018.

Society of Toxicology 57th Annual Meeting and Tox Expo. San Antonio, Texas. March 11-15,
2018

Society of Toxicology Continuing Education: Peri- and Prepubertal Developmental and
Reproductive Toxicity, March 2018.

Society of Toxicology Continuing Education: Xenobiotic Pharmacokinetics during Pregnancy and
Lactation, March 2018.

1st Southern Genome Maintenance Conference, University of Southern Alabama, Mobile
Alabama, October 20-21, 2018

2017

Member American Society of Clinical Pathologists 1/1/17

Member Environmental Mutagenesis and Genomics Society 1/1/17

Member Society of Toxicology 1/1/17

Member Air and Waste Management Association 1/1/17

Member Society of Environmental Toxicology and Chemistry 1/1/17

Member American Association for Clinical Chemistry 1/1/17

CE Course Anderson CE for La State Board of Medical Examiners, Clinical Laboratory
Personnel: Cellular and Molecular Immunology Part B 12/28/17 12 hours CEUs

Invited Presentation: Williams P., Family Law Center New Orleans, La. Effects of Drugs and
Alcohol on the Visual System-- May 19, 2017 (1 hour)

Invited Presentation: Tulane University Law School, Environmental Law Graduate Lecture:
General and Specific Causation from Environmental Exposures, Completed Exposure Pathways,
Mechanism of Action of Toxicants, Toxicology, Epidemiology, and Risk Assessment; Epigenetic
and Transgenerational Carcinogenesis, November 2017. (2 hours)

Anderson Continuing Education. Cellular and Molecular Immunology, Section B, 12 hours.
December 28, 2017.

2016

Member American Society of Clinical Pathologists 1/1/2016 1/1/16

Member Environmental Mutagenesis and Genomics Society 1/1/16

Member Society of Toxicology 1/1/16

Member Air and Waste Management Association 1/1/16

Member Society of Environmental Toxicology and Chemistry 1/1/16

Annual Meeting of AWMA New Orleans 2016

Annual Meeting of SOT New Orleans, Louisiana 2016

SOT CE: Embryology and Developmental Toxicity Testing 4 hours 3/13/2016

CE Course Anderson CE for La State Board of Medical Examiners, Clinical Laboratory
Personnel: Cellular and Molecular Immunology Part A 12/29/16 12 hours CEUs

Williams P M and McGregor D W (2016) "Absorption of BaSO₄ into the Nail Beds of Residents
from an Adjacent Oil Field Waste Site" at the 109th Air and Waste Management Association
Annual Conference and Exhibition, 2016, New Orleans, La.

Williams P M and Grice C P (2016) "Adverse Health Effects in Tar Ball Workers and Boat
Crews from Crude Oil/Corexit Mixtures from the Deepwater Horizon Oil Spill" at the 109th Air
and Waste Management Association Annual Conference and Exhibition, 2016, New Orleans, La.

Invited Presentation: Williams P, “Effects of Drugs and Alcohol on the Visual System”
Louisiana State Police Crime Lab, Baton Rouge, Louisiana, February 11, 2016
(1 hour)

Invited Presentation: Williams P, “Drugs and Alcohol”; LDAA (Louisiana District Attorneys Association) Prosecuting the Drugged Driver. Baton Rouge, Louisiana, September 26, 2016 (1 hour)

Invited Presentation: Tulane University Law School, Environmental Law Graduate Lecture: General and Specific Causation from Environmental Exposures, Completed Exposure Pathways, Mechanism of Action of Toxicants, Toxicology, Epidemiology, and Risk Assessment; Talcum Powder and Causation of Ovarian Cancer: Mechanistic Deficiencies. November 8, 2016 (2 hours)

Williams P M and McGregor D W (2016) “Absorption of BaSO₄ into the Nail Beds of Residents from an Adjacent Oil Field Waste Site” Proceedings of the 109th Air and Waste Management Association Annual Conference and Exhibition, 2016. Paper # 1106 2016

Williams P M and Grice C P (2016) “Adverse Health Effects in Tar Ball Workers and Boat Crews from Crude Oil/Corexit Mixtures from the Deepwater Horizon Oil Spill” Proceedings of the 109th Air and Waste Management Association Annual Conference and Exhibition, 2016. Paper #1152 2016.

Society of Toxicology 55th Annual Meeting and Tox Expo, New Orleans, Louisiana, March 13-17, 2016.

The 109th Air and Waste Management Association Annual Conference and Exhibition, New Orleans, Louisiana, June 19-23, 2016.

Microinjecting CRISPR: Options & key considerations for creating transgenic animal models. Technology Network Webinar. June 30, 2016

Anderson Continuing Education, Cellular and Molecular Immunology, Section A, 12 hours. December 29, 2016.

2015

Member American Society of Clinical Pathologists 1/1/15

Member Environmental Mutagenesis and Genomics Society 1/1/15

Member Society of Toxicology 1/1/15

Member Air and Waste Management Association 1/1/15

Annual Meeting of EMGS New Orleans 2015

Annual Meeting of SOT San Diego, California 2015

Member Society of Environmental Toxicology and Chemistry 1/1/15

SOT CE: Skeletal System Endocrinology and Toxicology 4 hours 3/22/2015

SOT CE: An Introduction to the Exposome 4 hours 3/22/2015

CE Course Anderson CE for La State Board of Medical Examiners, Clinical Laboratory Personnel: Hematology: A Pathophysiologic Approach 12/28/15 12 hours CEUs September, 2015

Invited Presentation: Tulane University Law School, Environmental Law Graduate Lecture: General and Specific Causation from Environmental Exposures, Completed Exposure Pathways, Mechanism of Action of Toxicants, Toxicology, Epidemiology, and Risk Assessment; Toxicology of Herbal Products and Dietary Products, December, 2015 (2 hours)

Williams P M and Grice C P (2015) "Adverse Health Effects including Optic Atrophy in Tar Ball Workers from Crude Oil/Corexit Mixtures from the Deepwater Horizon Oil Spill" Abstract Conference Proceedings of the 46th Environmental Mutagenesis and Genomics Society Annual Meeting, Symposium Presentation New Orleans, Louisiana, September, 2015 (1 hour)

Society of Toxicology 54th Annual Meeting and Tox Expo, San Diego, California, March 22-26, 2015

Society of Toxicology CE Course: An Introduction to the Exposome. 4 hrs credit. March 22, 2015.

Society of Toxicology CE Course: Skeletal System Endocrinology and Toxicology. 4 hrs credit. March 22, 2015.

Society of Toxicology CE Course: New Horizons in Chemical Carcinogenesis: Advances in Mode of Action and Mechanism of Cancer Pathogenesis. 1 hr credit. March 22, 2015.

2014

CE Course Anderson Continuing Education for LA State Board of Medical Examiners, Clinical Laboratory Personnel: How the Immune System Works. 12 hours credit December 28, 2014.

2014 Fracturing Impacts and Technologies Conference; Texas Tech University and Air and Waste Management Association, September 4, 2014.

Anderson Continuing Education (Louisiana Licensure) How the Immune System works, 12 hrs credit December 28, 2014.

Society of Toxicology CE Course: Epidemiology for Toxicologists: What the Numbers Really Mean. 4 hrs credit, March 23, 2014.

Society of Toxicology 53rd Annual Meeting, Phoenix, Arizona, 2014.

2013

3rd Anniversary of Deepwater Horizon Incident Conference: Louisiana Research Perspectives on the Deepwater Horizon 2010 Spill: The Good, The Bad, and The Ugly. April 22, 2013, Baton Rouge, LA.

Anderson Continuing Education (Louisiana Licensure) Clinical Hematology and Fundamentals of Hemostasis, 12 hrs credit December 29, 2013

Society of Toxicology Continuing Education Course: Toxic Effects of Metals. San Antonio, Texas. 4 hrs credit. March 10, 2013

Society of Toxicology Continuing Education Course: Gonadal Development, Function, and Toxicology, 4 hrs credit. San Antonio, Texas. March 10, 2013.

Society of Toxicology 52nd Annual Meeting, San Antonio, Texas, March 10-14, 2013

2012

Anderson Continuing Education (Louisiana Licensure) Clinical Hematology and Fundamentals of Hemostasis, 12 hrs credit December 29, 2012

Environmental Mutagen Society 43rd Annual Meeting, Bellevue-Seattle, Washington, September 11-13, 2012

Society of Toxicology Annual Meeting, San Francisco, California, March 11-15, 2012

Society of Toxicology Continuing Education Course: Micro-RNAs in Biology and Toxicology, 4 hrs credit. March 11, 2012

Society of Toxicology Continuing Education Course: Basic Embryology and Developmental Toxicity Testing, 4 hrs credit. March 11, 2012

2011

Anderson Continuing Education (Louisiana Licensure) Clinical Hematology and Fundamentals of Hemostasis, 12 hrs credit December, 2011

Environmental Mutagen Society 42nd Annual Meeting, Montreal, Quebec, Environmental Impacts on the Genome and epigenome: Mechanisms and Risks; October 15-19, 2011

Air and Waste Management Association, 104th Annual Conference & Exhibition, Orlando, Florida, June 21-24, 2011.

Deepwater Horizon Oil Spill Conference: Research From the Four University Consortium & LUMCON, LSU, Baton Rouge, LA April 29, 2011

Gulf Oil Spill, SETAC Focused Topic Meeting, Pensacola Beach FL, April 26-28, 2011

Society of Toxicology, Symposium Session: Toxicological Considerations in the Gulf of Mexico Oil Spill, March 7, 2011, Washington DC.

Society of Toxicology Continuing Education Course: Epigenetics in Toxicology: Introduction, Mechanistic Understanding, and Applications in Safety Assessment, March 6, 2011, Washington DC. 4 hours CE

Society of Toxicology Continuing Education Course: The Biology and Toxicology of the Peri- and Post-Natal Development, March 6, 2011, Washington DC. 4 hours CE.

2010

“Manual of Overdoses and Poisonings”, Anderson Continuing Education for Louisiana State Medical Examiners Board Licensure, 12 hours CE, December, 2010.

Health Damages caused by Chinese Drywall; Harris Martin Chinese Drywall Litigation Conferences, October 28, 2010, Miami, Florida.

2009

Society of Toxicology, 48th Annual Meeting and Tox Expo; Charlotte, North Carolina, March 15-19, 2009; **Symposium Session: MicroRNAs in Biology and Toxicology March 16, 2009 (2 hours 45 minutes) (9:15 am-12:00 pm)**

- MicroRNAs in Biology and Toxicology—*Hahn MD and Novak RF*
- MicroRNA Regulation of Signaling Pathways During Development—*Patton JG*
- MicroRNAs In Human Cancers and Carcinogenesis—*Croce CM*
- Aberrant microRNA Expression in Human Breast Oncogenesis—*Dombkowski AA, et al.*
- MicroRNA Expression in hepatic and Non-hepatic Tissues of Dioxin-Exposed rodents—*Okey AB and Harper PA*
- The Role of Nuclear Receptors in miRNA transcription—*Shah YM, et al*
- Panel Discussion

Society of Toxicology, 48th Annual Meeting and Tox Expo; Charlotte, North Carolina, March 15-19, 2009; **Poster Session: March 16, 2009 1:00 to 4:30 pm (3 hours 30 minutes)**

Ecotoxicology

- Translating in vitro extrogenic Assay Results to Ecological Risk Assessment
- In vitro Fish Metabolism predicts elimination of suspect bioaccumulative chemicals
- The effect of 2,4-Dinitrophenol on Zebrafish Swim Performance
- An Integrated Biomarker Approach for Assessing Health Impacts on Killifish Inhabiting the Heavily Contaminated NY/NJ Harbor Estuary
- Oxidative Balance in Oyster (*Crassostrea Spp*) of Estuary Boca de Camichin, Nayarit.

Toxicology of Kidney

- Impaired Renal Function and Glucose Metabolism in Calcineurin A Alpha Knockout Mice
- Effect of Urinary Constituents on the Differential Sensitivity to Ethylene Glycol-Induced Renal Toxicity in Wistar and F344 Rats
- Metabolites of Diethylene Glycol (DEG) are Responsible for the Renal toxicity Associated with Acute DEG Poisoning

Chemical and Biological Weapons

- Acute Toxicity, Toxicokinetics and Histopathology of Inhaled Ricin in BALB/C Mice and Sprague-Dawley Rats
- Acute Toxicity, Toxicokinetics, and Histopathology of Ingested Ricin in BALB/C Mice
- The Effects of Low Dose Sarin At Symptomatic and Asymptomatic Doses on Behavior and Catecholamine Levels in Mice.
- Development of a Pulmonary Injury Model of Inhaled Sulfur Mustard.

Society of Toxicology, 48th Annual Meeting and Tox Expo; Charlotte, North Carolina, March 15-19, 2009; **Symposium Session: Epigenetic Implications for Toxicology March 17, 2009 9:00 to 11:45 am (3 hours 45 minutes)**

- Epigenetics: The New Genetics of Toxicology—*Jirtle R*
- Epigenetic Regulation in Development: Implications in Stem Cell Biology and Toxicities—*Herman J.*
- Is There a Common “E-Epigenome”?—*Ho S.*
- MicroRNA Epigenetic Regulation—*Harris CC*
- Panel Discussion Q&A

Society of Toxicology, 48th Annual Meeting and Tox Expo; Charlotte, North Carolina, March 15-19, 2009; **Poster Session: Risk Assessment Applications (9:00-9:40 am)**

- Potential For Occupational Exposures of Hairdressers to Vinyl Chloride in Hairspray (1967-1974)

Society of Toxicology, 48th Annual Meeting and Tox Expo; Charlotte, North Carolina, March 15-19, 2009; **Symposium Session: Aquatic Species As Sentinels For Human Health: Comparative Toxicology of Metals, Nanoparticles, and PCB's March 17, 2009 1:30 to 4:15 pm (2 hours 45 minutes)**

- Aquatic Species as Sentinels for Human Health: Comparative Toxicology of Metals, Nanoparticles, and PCB's—*Wise J.*
- Whales as Sentinels for Human Health: A Global Assessment of Chromium Pollution—*Wise J.*
- Relative Toxicity of Metal Nanoparticles to Developing Zebrafish—*Tanguay RL*
- Comparative Toxicity of Silver Nanoparticles in Human, Marine, Mammal and Fish Cells.—*Wise SS.*
- Zebrafish Model for Understanding Methylmercury Developmental—*Carvan MJ*
- Immunotoxicity of PCBs, an example of marine mammals as sentinels for human health?—*S. De Guise*

Total Attendance Time at Symposia, Platform Sessions, etc. = 12 hours 45 minutes

Society of Toxicology, 2009 Continuing Education Course; 48th Annual Meeting and Tox Expo; Baltimore, Maryland March 15, 2009

Title: Immunology for Toxicologists-Chairpersons: Raymond Pieters, Institute for Risk Assessment Sciences (IRAS), Utrecht University, Utrecht, The Netherlands and Ian Kimber, University of Manchester, Manchester, United Kingdom **4 hours CE credit (8:15 am – 12 pm)**

Title: Free Radicals for Toxicologists—From the Basics to inflammation and Disease—Chairpersons: Lin L. Mantell, St. John's University, College of Pharmacy, Queens, NY/The Feinstein Institute for Medical Research, North Shore-Long Island Jewish Health System,

Manhassat, NY and Judith T. Zelikoff, New York University School of Medicine, Tuxedo Park, NY
4 hours CE credit (1:15 – 5:00 pm)
Total CEU credit = 8 hours

“Viral Fitness”, Anderson Continuing Education for Louisiana State Medical Examiners Board Licensure, 12 hours CE, December, 2009.

2008

Society of Toxicology, 47th Annual Meeting and Tox Expo; Seattle, Washington, March 16-20, 2008; **Symposium Session: Metals, Microglia, and Neuroinflammation 9:30 am to 12:15 pm March 17, 2008 (2 hours 45 minutes)**

- Metals, Microglia, and Neuroinflammation—*Lawrence D.*
- Role of Microglia in Metal Neurotoxicity—*Aschner M.*
- Potential Role of Microglia in Manganese Neurotoxicity—*Filipov NM, et al*
- Lead and Mercury Induced Neuroimmune Changes in the Brain—*Lawrence D, et al.*
- Microglial Activation or Microglial Degeneration?—*Streit WJ.*
- Questions from audience

Society of Toxicology, 47th Annual Meeting and Tox Expo; Seattle, Washington, March 16-20, 2008; **Symposium Session: Environmental Influence on Female Puberty and Breast Tumorigenesis March 17, 2008 1:30-4:15 pm (2 hours 45 minutes)**

- Environmental Influence on Female Puberty and Breast Tumorigenesis—*Maull EA, et al.*
- The Effect of Environmental Exposures on Mammary Stem Cells During Puberty—*Barcellow-Hoff M. et al.*
- Prenatal Exposure to Bisphenol A (BPA) Induces Genomic Alterations in the Rat Mammary Bland—*Russo J, et al.*
- Neonatal/Prepubertal Bisphenol A Exposure Alters the Mammary Proteome, Decreases Apoptosis and Increases Susceptibility for Chemically-Induced Mammary Cancer in Rats—*Lamartiniere C.*
- The Environmental Impact of Diet and Obesity on Breast Carcinogenesis—*Clegg D et al.*
- The Breast Cancer and The Environment Research Centers: A Novel Transdisciplinary Approach to Understanding the Causes and Mechanisms of Breast Cancer—*Winn D.*

Society of Toxicology, 47th Annual Meeting and Tox Expo; Seattle, Washington, March 16-20, 2008; **Issues Session: Over-the-Counter Cough and Cold Medications in Children: Efficacy, Safety, and Use March 18, 2008 7:30-8:50 am (1 hour 20 minutes)**

Society of Toxicology, 47th Annual Meeting and Tox Expo; Seattle, Washington, March 16-20, 2008; **Workshop Session: The Allergic March: The Role of Chemicals in the Increasing Prevalence of Allergy and Asthma March 18, 2008 9:00 am to 11:15 am (2 hours 15 minutes)**

- The Allergic March: The Role of Chemicals in the Increasing Prevalence of Allergy and Asthma—*Kimber I, et al*
- Introduction: The Changing Face of Allergy and Asthma—*Vanoirbeek J*
- The Influence of Particulate Air Pollutants on Allergic Sensitization in Animal Models—*Gilmour M.*
- The Hygiene Hypothesis and Beyond—*Kimber I.*
- Particulates, Allergy, and Asthma—*Lovik M.*

Society of Toxicology, 47th Annual Meeting and Tox Expo; Seattle, Washington, March 16-20, 2008; **Workshop Session: To Dye or Not To Dye: Safety of Oxidative Hair Dyes March 18, 2008 11:15-11:30 am (30 minutes)**

- Current Safety Concerns About Oxidative Hair Dyes: European Perspective— *Platzek T.*

Society of Toxicology, 47th Annual Meeting and Tox Expo; Seattle, Washington, March 16-20, 2008; **Poster Session: March 18, 2008 1:00 pm to 3:45 pm (2 hours 45 minutes)**

Nanoparticles: Target Organs

- Analysis of Dermal Penetration of Titanium Dioxide from sunscreen formulations containing micron- and nano-scale particles of TiO₂
- Studies on SiO₂ Nanoparticle Characterization and its relationship to toxicity in Keratinocytes
- Intravenous Administration of Gadolinium modified nanoparticles to Sprague-Dawley rats.
- Assessment of the Toxicity of Silver nanoparticles In vitro: A mitochondrial perspective
- Acid-functionalized single-walled carbon nanotubes enhance cardiac ischemic/reperfusion injury
- Cytotoxic Effect of Silica nanoparticles in human immunological cells
- Study of hepatotoxicity biomarkers in Swiss-Webster mice treated with carbon nanotubes
- Enhancement of platelet activation and thrombus formation by silver nanoparticles
- cytotoxicity of micro and nano metallo-oxide: A Comparative Study.

Assessment of Ecological Toxicology

- Bioaccumulation of Mercury from Mercury Contaminated Soils by the Earthworm *Lumbricus terrestris*.
- Effects of Cadmium on Growth and Metamorphosis of African Clawed
- Hepatic Gene Expression in Rainbow Trout Exposed to Different Hydrocarbon Mixtures
- Specific AHR and Eralpha in vitro Toxicity of Crude and Refined Petroleum Products
- Effects of Benzo[a]pyrene on mitochondrial DNA damage in the Killifish.
- Effects of Polybrominated Diphenylether Exposure on Steroidogenesis in Juvenile *Xenopus*
- Monitoring of Environmental Polycyclic Aromatic Hydrocarbons (PAH) in Fish, vegetation and soil from the Cucharillas marshland, Catano, Puerto Rico
- Comparing the Toxicity and Bioaccumulation Potential of Bulk and Nano Aluminum oxide using *Eisenia Fetica*.
- Biomarkers of Exposure and Toxicity in Ecological receptors.

Society of Toxicology, 47th Annual Meeting and Tox Expo; Seattle, Washington, March 16-20, 2008; **Workshop Session: Dermal Toxicological Assessment of Nanomaterials and Nanodevices. March 18, 2008 3:45 to 4:15 pm (30 minutes)**

- Assessment of the Dermal Penetration and Toxicity of Nanoparticulate metals—*Roberts SM*

Total Attendance Time at Symposia, Platform Sessions, etc. = 12 hours 50 minutes

Society of Toxicology, 47th Annual Meeting and Tox Expo; **Society of Toxicology, 2008 Continuing Education Courses**, Seattle, Washington, March 16, 2008;

- **Title: Basic Embryology and Developmental Toxicology**-Chairpersons: Lori A. Dostal, Aptuit Consulting Inc. Brighton, MI and John M. Rogers, Reproductive Toxicology Division, Environmental Protection Agency, Research Triangle Park, NC. **4 hours CE credit (8:15 am – 12 pm)**

- **Title: Nanotoxicology: The Science of Developing a Safe Technology—**
Chairpersons: Justin G. Teeguarden, Pacific Northwest National Laboratory, Richland WA and Christie M. Wayes, Texas A&M University, College Station, Texas. **4 hours CE credit (1:15 – 5:00 pm)**

Total CEU credit = 8 hours

Clinical Immunology and Serology: A Laboratory Perspective, 2nd, edition, Section C”, Anderson Continuing Education for Louisiana State Medical Examiners Board Licensure, 12 hours CE, December, 2008.

2007

Society of Toxicology, 46th Annual Meeting and Tox Expo; Charlotte, North Carolina, March 25-29, 2007 **Workshop Session: Environmental Risk Factors for Autism (2 hours 45 minutes) (9:30 am-12:15 pm)**

- Environmental Risk Factors for Autism - *E. Silbergeld*
- Trends in the Incidence and Prevalence of Autism Spectrum Disorders: Clues for Generating Hypotheses on Environmental Risk - *C.J. Newschaffer*
- Cell and Molecular Mechanisms of Neurodevelopment: Clues for Identifying Environmental Risk Factors for Autism? - *P. Lein*
- Identifying Environmental Contributors to Autism Risk; Insights from Neurobiology and Immunology – *I. N. Pessah*
- Teratogens and Autism – *P. M. Rodier*
- Autism: What Does Mercury Have To Do With It? *E. Silbergeld*

Platform Session: Nanoparticles: Aquatic Species to Mammals March 26, 2007 (2 hours 45 minutes) (1:30-4:15 pm)

- Development of a Base Set of Toxicity Tests As a Component of a Nanoparticle Risk Management Framework – *D.B. Warheit et al*
- Toxic Effects of Nanocopper on Zebrafish, Danio Rerio – *J. Griffitt et al*
- Bi-valve Mollusks as Valuable Models for Characterizing Nanoparticle Toxicity – *A. H. Ringwood et al*
- Nanoparticles Stimulate Intracellular and Extracellular Radical Species – *E. Rushton et al*

Symposium Session: Understanding the Linkages Between Environmental Toxicity and Human Disease: From Observation to Mechanistic Insight and From Insight to Therapeutics

- Childhood Cancer as Model for Developmental Disorders – *A. F. Olshan et al*
- Hormones, The Environment and Cancer – *C. Walker*

Symposium Session: Pigs and the Public’s Health: An Assessment of Hog Farming In North Carolina March 27, 2007 9:00-11:45 am (2 hours 45 minutes)

- Pigs and The Public’s Health: An Assessment of Hog Farming In North Carolina – *DJ Crawford-Brown et al*
- An overview of Community Health Concerns Relative to Concentrated Animal Feeding Operations – *KJ Donham*
- Public Health Impacts of Industrial Swine Production – *S. Wing*

- Potential Health Effects of Odorous Aerial Emissions From Swine Production Waste: Role of VOCS and Particulates – *S.S.Schiffman*
- Hogs As Sources of Enteric and Occupational Illnesses in Humans – *R Holley*
- Ecological Impacts and Ramifications of Atmospheric Nitrogen Deposition To Estuarine and Coastal Waters: The Concern About Agricultural Ammonia Emissions – *HW Paerl et al*

Platform Session Risk Assessment 1:30-3:35 pm March 27, 2007 (2 hours 5 minutes)

- Chemicals and Gender Differences – *G. Johanson, et al.*
- Risk Assessment on Veterinary Drugs Resided in Livestock Products for Risk Management – *S. Jeong et al.*
- Communicating Chemical Safety, Risk Perception and Hazard to Lay Public: The Global Harmonized System of Classification and Labelling of Chemicals in Thailand (GHS) – *S. Lapyai*
- Concentration/Duration/Effect (C x T) Relationships in Assessments of Health Risk From Acute Inhalation Exposures—Comparison of Approaches – *G. M. Woodall, et al.*
- Lead (Pb) Effect Levels and Tolerable Levels of Exposure—*PM Bolger and CD Carrington*
- Lower Sensitivity of Humans Compared to Rats to 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD), 2,3,4,7,8—pentachlorodibenzofuran (PECDF) or 2,3,7,8-tetrachlorodibenzofuran (TCDF)-induced CYP1A Expression.—*Rowlands C, et al*

Symposium Session: Epigenetic Regulation in Development, Reproduction and Disease: Implications for Toxicology 9:00-11:45 am March 28, 2007 (2 hours 45 minutes)

- Epigenetic Regulation in reproduction, development and disease: implications for toxicology—*Shuey DL and Watson R.*
- Introduction to Epigenetic Mechanisms—*Watson RE*
- Epigenetics and Carcinogenesis: The Role of Altered DNA Methylation—*Goodman JJ*
- Epigenetic Regulation of Ovarian Function—*LaVoie HA*
- Epigenetic Programming by Maternal Behavior—*Szyf M.*
- Valproate: Novel Analogues, Applications and Mechanisms—*Nau H.*
- Paternal Exposure to Cyclophosphamide (CPA) disturbs Epigenetic Programming During Early Embryo Development.—*Hales BF.*

Symposium Session: Cardiovascular Effects of Inhaled Ultrafine and Fine Particles in Human Volunteers. 1:30-4:15 pm March 28, 2007 (2 hours 45 minutes)

- Cardiovascular effects of inhaled ultrafine (Nano) Particles in Human Volunteers
- Human Clinical Studies of Elemental Carbon Ultrafine Particle Inhalation: Effects on Vascular Function—*Frampton MW*
- Biological Responses of Healthy Human Volunteers Following Exposure to Concentrated Ambient Coarse, Fine, and Ultrafine Particles—*Devlin R., et al*
- The Effects of Combustion Derived Nanoparticulate on Vascular and Endogenous Fibrinolytic Function in Man—*NL Mills, et al*
- Do Clinical Findings With Particle Exposures (Including Ambient PM Fractions, Carbon, and Diesel Exhaust) Explain Epidemiological Results?—*Gong H and Cassee FR.*

Total Attendance Time at Symposia, Platform Sessions, etc. = 15 hours 50 minutes

Society of Toxicology, 2007 Continuing Education Course; 46th Annual Meeting and Tox Expo; Charlotte, North Carolina, March 25, 2007; **Title: Fundamentals of Human Health Risk Assessment with a Case Study Approach**-Chairpersons: Teresa Leavens, CIIT Centers for

Health Research, Research Triangle Park, North Carolina, and Jennifer Orme-Zavaleta, NHEERL/US EPA, Research Triangle Park, North Carolina. **4 hours CE credit**

“Clinical Immunology and Serology: A Laboratory Perspective, 2nd edition, Section B”, Anderson Continuing Education for Louisiana State Medical Examiners Board Licensure, 12 hours CE, December, 2007.

Previous Years 2006 and Prior:

University of Kansas Medical Center, Department of Pharmacology, Toxicology, and Therapeutics, Mid-America Toxicology Course, 2006

Biochemistry: Metabolism of Proteins and Amino Acids; Structure, Function, and Replication of Informational Macromolecules; Biochemistry of Extracellular and Intracellular Communication; 12 hours CEU; Anderson Continuing Education, December, 2005

“The Mold Challenge in Louisiana.” New Orleans, Louisiana, March 15, 2005.

University of Michigan, Summer Graduate School in Epidemiology, “Analysis of Epidemiologic Data: An Applied Approach” 2004 Continuing Education. Total Number of Non-Credits, 1. Total Number of CEU Hours, 17.5.

Biochemistry: Structures & Functions of Proteins and Enzymes; Bioenergetics and The Metabolism of Carbohydrates & Lipids; 12 hours CEU; Anderson Continuing Education, December, 2004

University of Michigan, Summer Graduate School in Epidemiology, “Occupational & Environmental Exposure Assessment” and “Basic Computer Applications in Epidemiology”, 2002 Continuing Education. Total Number of Non-Credits, 1. Total Number of CEU Hours, 35.0.

Tufts University School of Medicine, Epidemiology Research Institute, Graduate Credit in Epidemiology, “Biology & Epidemiology of Cancer” and “Occupational & Environmental Epidemiology”, 2001. Total Number of CEU Hours, 30.0. Graduate Credit, 2.0 hours.

ASCP Workshops for Laboratory Professionals, Birmingham, Alabama, October 2-4, 2000.

Keystone Symposia, Taos, New Mexico, February 10-15, 2000.

Tulane Law School Conference, New Orleans, Louisiana, February 26-27, 1999.

LSU Medical Center, School of Allied Health Professions, Department of Medical Technology: "Hemopoietic and Immunopoietic Systems: Functions and Disorders." Karel A. Dicke, MD, September 1985. 1.0 hour.

ICN-UCLA Conference: Recent Advances In Bone Marrow Transplantation. Park City, Utah, February 1984.

American Society of Clinical Pathologists-College of American Pathologists, Fall Meeting. New Orleans, Louisiana. October 1984.

American Society for Hematology Meeting. San Francisco, California, December 1984.

College of American Pathologists/American Society of Clinical Pathologists Workshop: DRG Fallout: Implications for the Pathologists and Health Care Systems. New Orleans, October 1984.

College of American Pathologists/American Society of Clinical Pathologist Workshop: DRG Fallout: Implications for the Pathologists and Health Care Systems, October 1984. 6.5 hours.

ICN-UCLA Conference: Normal and Neoplastic Hematopoiesis. Keystone, Colorado, March 1983.

ICN-UCIA Conference: Differentiation and Function of Hematopoietic Cell Surfaces. Keystone, Colorado, February 1981.

Hybridoma and Cellular Immortality Conference. University of Texas, M.D. Anderson Hospital and Tumor Institute; November 1981.

Immunocytochemical Workshop Research Laboratories, Burroughs Wellcome Co., Duke University, North Carolina, October 1979.

PROFESSIONAL SOCIETIES:

Air and Waste Management Association, Member

Society of Toxicology, Member

Society of Environmental Toxicology and Chemistry, Member

Environmental Mutagenesis and Genomics Society, past Member (EMS)

American Association of Clinical Chemistry. (AACC) Member.

American Society of Clinical Pathologists. (ASCP) Member.

American Society for Occupational and Environmental Health (SOEH) Past Member

American Public Health Association. (APHA) Past Member.

American Chemical Society. Past Member.

American Association for the Advancement of Science. (AAAS) Past Member.

American Society for Medical Technologists, Past Member

American College of Chest Physicians. Past Member.

American Thoracic Society. Past Member.

Lupus Foundation of Northern California, Past Member.

The Chest Foundation. Past Member.

The Society for Male Reproduction & Urology. Past Member.

American Society for Reproductive Medicine. Past Member.

Clinical Laboratory Personnel Association, 1991-1994.

American Society for Microbiology, 1975-77.

American Society for Medical Technology, 1975-80, 1988-1993.

Louisiana State Society for Medical Technology, LSSMT, 1975-80, 1988-1993.

Louisiana State Society for Medical Technology, Student Forum Founder and Advisor, 1977-79.

Louisiana Society for Electron Microscopy, 1974-83.

Greater New Orleans Chapter of the Society for Neuroscience, 1981-83.

American Society for Cell Biology, 1983-1985.

International Society of Experimental Hematology, 1983-1988.

American Society of Hematology, 1985-88.

International Society for Experimental Hematology, 1985-88.

Other Scholarly or Professional Activities:

Louisiana State Society for Medical Technology, Governmental Liaison for Licensure, 1990-1993. Organize legislative testimony and legislative liaison for licensure bill for clinical laboratory personnel; lobby for and organize grass roots lobbying for statewide membership for licensure bill.

Clinical Laboratory Personnel Association, Founder and Member 1991-present, Chairman of Licensure Committee, 1991-1993. Founder of the Clinical Laboratory Personnel Association, a new statewide organization for the purpose of education and unifying clinical laboratory personnel on the licensure effort in the legislature. This new organization will monitor the Civil Service Commission and the Louisiana Health Care Authority rulings that pertain to medical technology.

Implementation of Minority/Disadvantaged Incentives in the Department of Medical Technology: In order to provide minority representatives in the Profession of Medical Technology, it was necessary to implement teaching and testing methods that would enhance successful completion of the baccalaureate degree by minority/disadvantaged students. The standards of the Department are of unquestionable excellence. The minority/disadvantaged incentives have allowed for minimal attrition and maximal success in pursuit of academic excellence. For the second year in a row, we are seeing the results of these incentives. Graduates of our program have had 100% passage on our National Registry Exam for the second year in a row. Our class average ranks in the 12th (1990) and 16th (1991) percentile of the nation. These results include as many as 30% minority/disadvantaged students. Many of these students applied to our program with GPA's less than 2.5 and were accepted as a part of our program for high-risk minority/disadvantaged students. At this time I am preparing these methods and results of our minority/disadvantaged incentives for publication.

Lambda Tau National Honorary Medical Technology Society, Founder of University of New Orleans Chapter, 1977, Faculty Moderator, 1977-82.

AWARDS SHOWING RECOGNITION OF SCHOLARLY OR PROFESSIONAL ACHIEVEMENT:

Arceneaux Memorial Award in Recognition of Outstanding Student Research in Electron Microscopy, May 1981.

Louisiana State Society for Medical Technology Award for Outstanding Service, April 1991.

Louisiana State Society for Medical Technology Award for "Medical Technologist of the Year." April 1992.

Louisiana State Society for Medical Technology Award for Outstanding Service, April 1993.
American Society for Medical Technology Award for Outstanding Service, June 1993.

GRANTS AND CONTRACTS:

American Heart Association Graduate Educational Research Grant. July 1980-July 1981.
Development of an Assay for Thrombopoietin.

American Heart Association Graduate Educational Research Grant. July 1981-December 1982.
Characterization of Megakaryocytopoiesis.

American Cancer Society, September 1982-September 1983 Title: Immunocytochemical Characterization of Skin Biopsies in the Diagnosis of Human Acute Graft-Versus-Host Disease in Leukemia \$5000.00

American Heart Association, July 1984-July 1985 Title: Isolation and Characterization of 4N and 8N Megakaryocytes \$14,000

Health Careers Opportunity Program (H-COP), September 1988-August, 1991. Title: Allied Health Careers Enrichment and Retention Program for Minority/Disadvantaged Children, \$452,000

Education and Clinical Management Program for Emergency Room Asthmatics, River Parishes Hospital, St. John the Baptist Parish, September 2000 – present. Summer Camp for Asthmatic Children in St. John the Baptist Parish, July 1999 – 2000. Asthma Registry for citizens of St. John the Baptist Parish, January 2002 – July 2002. \$163,000 Funding Source: Louisiana Environmental Action Network.

COMMUNITY HEALTH ASSESSMENT PROJECTS:

Retrospective Study of Health Effects of the Grand Bois Community, 1997- 1998, National Institute of Mental Health NIH-97-6, Certificate of Confidentiality, Institutional Review Board for Human Research Number: 97-444.

Medical Surveillance of the Children and Pregnant Women of the Grand Bois Community, 1998-1999, Institutional Review Board for Human Research Number: 97-607, Funding Source: Department of Health and Hospitals, \$50,000.

Medical Surveillance of the Adult Residents of the Grand Bois Community, 1998-1999, Institutional Review Board for Human Research Number: 97-607, Alteration Protocol, Funding Source: Louisiana State Legislature, \$100,000.

Medical Surveillance of the residents of the Town of Gibsland in accordance with the Lupus Study Project. March 18, 2000.

MAJOR AREAS OF RESEARCH INTEREST:

Heavy Metal Toxicity; Heavy metal concentrations in Shrimp and Crayfish. Reproductive Toxicology, Birth Defects and Childhood Cancers due to creosote exposure, Epidemiology of clinical symptoms due to toxic chemical exposure, Megakaryocytopoiesis, Thrombopoiesis, Bone marrow suppression due to toxic exposure, Erythropoiesis, Graft versus Host Disease, Immunocytochemical and Electron microscopic techniques; Fetal Alcohol Syndrome/Fetal Alcohol Effects; surveying for Toxic Exposure in the Workplace, medical surveillance for prevention of chronic diseases for toxic exposure, latency period for chronic myelogenous leukemia due to benzene exposure,. Clinical and Educational Management of Asthma.

August 21, 2023
